PROJECTS

FullStack Academy (New York, NY) 2019 - *Software Engineer*

AllSign - React, Redux, Semantic-UI, Nodejs, Express, Flask, Tensorflow

allsign.herokuapp.com/ | github.com/D3Doritos
- Designed and trained a Tensorflow model to recognize a limited range of ASL gestures.
- Created a web based React application to provide users access point to the model.
- Employed Scrum/Agile strategies to structure the project, assess goals and boost productivity.

Wind Cycle Thingy - React, React-Leaflet, Axios

github.com/SShneider/wctwexpress
- Created a chrome app that predicts weather over a cycling route and notifies of favorable conditions.
- Used Axios to interact and retrieve data from Strava, Leaflet and Weather.gov api.

Old Town Node - React, Redux, Nodejs, Express, Sequelize, Postgres

old-town-node.herokuapp.com/ | github.com/OldTownNode/GraceShopper
- Built a fully functional ecommerce website, including Google OAuth and Stripe Checkout.
- Managed and scheduled a team of 4 people.
- Assigned tasks, verified code compatibility, ran deployment.

EDUCATION

FullStack Academy New York, 2019: Software Engineer Immersive

St Joseph's College, New York, 2006: Biology, Marketing

EXPERIENCE

Bitdream (Minsk, Belarus) - *Manager, IT Manager, 2017-2018*
- Oversaw and maintained a cryptocurrency mining operation.
- Negotiated, purchased and imported necessary computer components.
- Acquired and retrofitted commercial property to required electrical specifications.
- Tracked the market and planned the mining strategy.

Toy Mountain (New York, NY) - *Manager, 2012-2017*
- Oversaw an e-commence enterprise from start to finish.
- Established functionality and supervised creation and deployment of an e-commerce software that allowed automated inventory listings on e-commerce websites.
- Supervised acquisition of wholesale orders and imports.
